TRANZFORM ACCORDION FOLDING FIRE DOORS

Are you looking for a better solution to your design challenge? Is fire protection hindering your design to maintain an open floor plan? Do you need fire protection but lack the headroom for a standard coiling fire door? Do you need fire protection and emergency egress at the same time?

McKee Door Sales' Architect Advantage Team has your solution. The "Tranzform Accordion Fire Door," manufactured by Cornell Iron Works, is the industry leader in emergency response closure products.

Key Features:

This innovative product offers up to three hour Underwriters Laboratories labeled fire protection and provides smoke and draft control, automatic closing in the event of alarm activation, and emergency egress.

- Track at the header eliminates the need for floor track
- **Two year product warranty from date of shipment**
- Remote monitoring capabilities
- **Panels are continuous length and roll formed of commercial grade steel**
- Aesthetic finishes available
- Ease of diagnostics and maintenance, including local support representatives to perform the required installation, annual testing, and repairs
- **Common applications for this product are seen in elevator lobbies, fire and smoke-rated corridor openings, large opening area separations like airport terminals or casinos, underground parking facilities, and in buildings requiring an area of refuge**
- Space and Sound models are also available
