Wayne Dalton ThermoMark 530

McKee Door Sales, Inc. is proud to announce the release of our newest innovative product: the Wayne Dalton ThermoMark 530. The ThermoMark 530 is designed to deliver optimal performance in commercial and industrial applications where climate control and durability are primary concerns.

Product features include:

- 3" thick foamed in place construction
- 26.0 R value
- Dual barrier tongue-and-groove joint
- Low air infiltration rating of .09 cfm/sq.ft. at 15 mph
- STC rating of 22
- 1 3/4" True PVC thermal break between front and back skins
- Large windows 25" W x 13" H available with insulated glass, tempered glass, or multi-wall polycarbonate glazing
- Available exterior colors of White, Almond, Taupe, or Brown

Applications:

Where thermal performance and maximum durability are key!

Contact McKee Door Sales' Architect Advantage Team to assist you with specifying the appropriate doors for your project.
